	Examiner-Initiated Interview Summary	**Application No.**	**Applicant(s)**
		10/749,808	WOBBE ET AL.
		Examiner	**Art Unit**	
		TAE KIM	2887	

All Participants: **Status of Application:** _____

  (1) _TAE KIM_.   (3) _____.

  (2) _Myunggon Hong (65,034)_.   (4) _____.

Date of Interview: _5/27/11_ **Time:** _11;30AM_

Type of Interview:
☒ Telephonic
☐ Video Conference
☐ Personal (Copy given to: ☐ Applicant   ☐ Applicant's representative)

Exhibit Shown or Demonstrated: ☐ Yes   ☒ No
  If Yes, provide a brief description: .

Part I.

Rejection(s) discussed:
_112 1st_

Claims discussed:
_1_

Prior art documents discussed:
_n/a_

Part II.

SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:
See Continuation Sheet

Part III.

☒ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.

☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.

(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: The discussion was on whether the matter disclosed by the phrase, "the at least one fade out indicator indicates a frequency of the selected master data being accessed or modified for a certain time period," is OR is not part of the original disclosure. Paragraph 51 of the specification states that, 'MDMS 2000 may run batch programs to create list(s) of objects … in light view of the fade out indicators.' **In combination**, Paragraph 52 of the specification states that, 'a batch program in MDMS 2000 may track the most frequently used data 8100,'. While the disclosure is a little vague and inexplicit, examiner determined that the idea about the matter disclosed by the phrase, "the at least one fade out indicator indicates a frequency of the selected master data being accessed or modified for a certain time period," is implicitly incorporated in these two paragraphs. In order for the MDMS 2000 to track the most frequently used data MDMS must track the frequency of the usage of data. And the batch programs is to create list(s) of objects … in view of the fade out indicators. Therefore, the spec implies that the the fade out indicators may be used to track the frequency of the usage of (or access to) data. Therefore, the 112 1st Rejection is withdrawn.
